13. ☑ Other: <u>See Continuation Sheet</u> .		Ametoil Beds								
•	Su	pervisory Patent Ex								
		Group 3700								

Continuation of 11. does NOT place the application in condition for allowance because: the examiner still believes that Fukuda's patent '098 discloses the claimed limitations of transverse sealing jaws that are movable in a vertical plane (Figs. 11a, 11b via sealing jaw 40 moving verically and Figs. 14a-14c) perpendicular to a front side of the machine (Fig. 1; via by considering the front side of the machine as facing the width of belt 101); first longitudinal sealing means (via 102) that are positioned at a first side/lateral side of the form-fill tube (Fig. 1; via 102 positioned at lateral side with respect to fill tube 96). Alternatively, the exact location of stations in respect to another is a matter of engineering design choice, as long as the reference discloses the claimed stations and using the stations for the same purpose as the claimed invention.

Continuation of 13. Other: Fig. 1 of Fukuda's patent '098 with clarifying the front side of the machine in respect to the movement of the transverse sealing jaws.
